I am a 7th semester Informatics student at Ahmad Dahlan University with a strong passion for web development, particularly in Frontend, Backend, and Fullstack development. I have hands-on experience working on real-world projects, including an internship project for a school website. Throughout my academic journey, I have been actively involved in various organizations such as HMIF, BEM, and multiple event committees, which have strengthened my leadership, teamwork, and communication skills.

Guided by the principle: *"If you can't find a good person around you, then be the one,"* I strive to bring a positive impact through every project and collaboration I am part of. I am proficient in tools and technologies such as Visual Studio Code, React.js, TypeScript, Laravel, and Tailwind CSS—equipping me with the skills to build modern, responsive, and efficient web applications.

Work Experiences

SD Muhammadiyah Bausasran - Yogyakarta, Indonesia
April 2025 – July 2025

Fullstack Developer Intern

SD Muhammadiyah Bausasran is a private elementary school in Yogyakarta committed to providing quality education rooted in Islamic values. The school actively integrates technology to improve public engagement, school branding, and student admission services..

- Developed a full-featured School Information System that includes a dynamic company profile website, admin panel for content management, and an online PPDB (student admission) system.
- Independently handled both frontend and backend development using Laravel, Filament, and MySQL to ensure smooth and efficient performance.
- Designed and implemented a user-friendly interface for school administrators to easily update content such as news, galleries, achievements, and more.
- Collaborated with a team for planning and coordination, while taking full responsibility for the coding and technical implementation.
- Contributed to the digital branding of the school by creating an informative and engaging platform that also streamlines the new student registration process

Horus Technology - Yogyakarta, Indonesia
October 2025 – Januari 2026

Fullstack Developer Intern

Horus Technology is a technology company focused on developing AI-driven and enterprise software solutions to support business and operational efficiency.

- Contributed to the development of TING software, primarily on the frontend side, including UI implementation and integration with backend APIs..
- Developed and redesigned multiple company digital assets, including the Horus corporate website and TING landing page, to support branding and product communication.
- Performed design slicing and frontend implementation for DMS (Document Management System) tailored to client requirements.
- Participated in building the Horus Demo for Agentic AI, handling frontend development, backend API integration, and Server-Sent Events (SSE) implementation for real-time data communication.
- Actively collaborated with backend engineers, product team, and stakeholders to align technical implementation with business goals.
- Gained early exposure to product strategy through direct discussions with the CEO during the first month of joining, contributing technical perspectives to product direction and feature planning.

Education Level

Universitas Ahmad Dahlan (UAD) - Yogyakarta, Indonesia
Aug 2022 - Present

Undergraduate Informatics Engineering, 3.50/4.00

- Actively studying core topics in software engineering, web development, and computer science..
- Currently in the 5th semester with a strong focus on Fullstack Development using modern frameworks like Laravel and React.
- Awarded Best Team in FI-CHALLENGE at FIPEX UAD.
- Participated in various web design competitions to improve technical and creative skills.

SMK Negeri 1 Lamongan- Lamongan, Indonesia
July 2019 - May 2022

Multimedia Major

- Focused on visual communication, digital content creation, and creative technology
- Gained hands-on experience in graphic design, video editing, photography, and basic web design.
- Built a strong creative and technical foundation that supports current work in fullstack development.

Organizational & Committee Experiences

Himpunan Mahasiswa Informatika (HMIF) - **Yogyakarta, Indonesia**   Jan 2023 - Des 2023

Staff of Strategic and Aspirational Studies Division (AKASTRAT)

- Served as a liaison between students and faculty, addressing academic and campus-related issues.
- Collected and conveyed student aspirations to the department.
- Facilitated communication to ensure student concerns were heard and acted upon by the program.

BEM Faculty of Industrial Technology (BEM FTI) -**Yogyakarta, Indonesia**   Jan 2024 – Des 2024

Head of the Cadre Development Department

- Led department planning by creating program matrices and organizing leadership development agendas.
- Supervised department members and ensured the execution of all programs aligned with organizational goals.
- Responsible for team coordination, delegation, and maintaining communication flow within the department.

FTI Anniversary (Milad FTI) 2024 – UAD -**Yogyakarta, Indonesia**   Des 2024 – Des 2024

Chief Executive (Chairperson)

- Led the organizing committee in designing and executing celebratory programs for the Faculty of Industrial Technology..
- Managed coordination across divisions, event timeline, and ensured smooth execution of the anniversary series..
- Promoted faculty identity and unity through various internal and external events..

Informatics Competition 2023(UAD) -**Yogyakarta, Indonesia**   oct 2023 – oct 2023

Chief Executive (Chairperson)

- Oversaw the entire event execution from planning to post-event evaluation.
- Coordinated multiple teams including technical, publication, and logistics divisions.
- Ensured the event met academic and competitive standards while promoting collaboration among participants.

Project

School Information System – SD Muhammadiyah Bausasran

Laravel, FilamentPHP, phpMyAdmin| Internship Project   2025

- Developed a dynamic school profile website to enhance the school's branding and online presence.t.
- Built an admin panel using FilamentPHP for managing various content: news, gallery, teachers, facilities, testimonials, and more.
- Integrated an online PPDB (student admission) form to support digital enrollment.
- Managed the database using MySQL via phpMyAdmin.

Car Rental Website   2025
React TypeScript, Laravel, FilamentPHP, phpMyAdmin| Freelance Project

- Created a responsive web application for a car rental business, allowing users to view and rent available vehicles..
- Built a fullstack system with Laravel backend and React TypeScript frontend.
- Implemented admin features to manage car listings, rental schedules, and customer data.
.

Tri Jaya Agung Business Website   2025
React TypeScript, Laravel, FilamentPHP, phpMyAdmin| Freelance Project

- Developed a business profile website for a local building materials store.
- Integrated a dynamic product catalog that could be updated by the owner through an admin panel..
- Focused on clean UI/UX and business credibility.

Boarding School Management System   2025
React TypeScript, Laravel, FilamentPHP, phpMyAdmin| Freelance Project

- Built a school management system for a boarding school to digitize administrative tasks.
- Included features such as student data management, activity scheduling, and news updates.
- Admin dashboard was made user-friendly for school operators.

Tourism Destination Website   2024
HTML, Tailwind CSS, AOS | Competition Project

- Designed and developed a static website for showcasing local tourist destinations..
- Utilized Animate On Scroll (AOS) for smooth transitions and visual appeal.
- Focused on responsive layout and engaging visual storytelling..

Student Organization Database System   2024
HTML, Tailwind CSS, AOS | Organizational Project (BEM FTI)

- Created an internal system to manage and display organizational data of student bodies.
- Included program data, member structure, and documentation gallery
- Aimed to support transparency and student access to organization information..

Trainings and Seminars

- **Soft Skill Training Stage 1** 2023

- **Leadership Education** 2023

- **Design Thinking Webinar** 2023

- **Google Developer Seminar** 2024

Awards, Skills, and Certifications

- **Award** ⊘ (2023) : Best Team – FI-CHALLENGE Fipex 2024
- **Soft Skills** : Analytical Thinking,Team Collaboration, Time Management, Problem Solving, Communication
- **Hard Skills** : Frontend & Backend Web Development,Responsive Website Design,CRUD Operation & REST API,Database Management,Version Control with Git
- **Programming Language Skills** : C++,Java,Python,JavaScript, PHP
- **Tools Skills** : ☐ Laravel,React JS / TypeScript,Tailwind CSS,FilamentPHP,Git,Visual Studio Code, phpMyAdmin
