081358092166 | [joangjo22@gmail.com](mailto:joangjo22@gmail.com) | <https://www.linkedin.com/in/sholahudin-jauhari-el-sya-na-608073304/> <https://github.com> / <https://github.com> / <https://web-jo-profil-gd7n.vercel.app/>

Informatics student at Ahmad Dahlan University with experience in Frontend Web Development through three internships and various freelance projects. Experienced in building responsive and user-friendly web interfaces using React, TypeScript, Vue.js, JavaScript, and Tailwind CSS. Skilled in translating UI/UX designs into functional applications, integrating REST APIs, and creating engaging user experiences across desktop and mobile platforms. Passionate about developing modern, accessible, and high-performance web applications.

## Work Experiences

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                             |

| <b>FTI Anniversary (Milad FTI) 2024 – UAD -Yogyakarta, Indonesia</b><br>Chief Executive (Chairperson) <ul style="list-style-type: none"><li>Led the organizing committee in designing and executing the faculty's anniversary celebration series, coordinating across multiple divisions and the full event timeline.</li><li>Drove faculty identity and unity through a mix of internal and external events.</li></ul>                                                               | Des 2024 – Des 2024 |
| <b>Informatics Competition 2023(UAD) -Yogyakarta, Indonesia</b><br>Chief Executive (Chairperson) <ul style="list-style-type: none"><li>Oversaw full event execution from planning through post-event evaluation as chairperson for the second time in one year, building on leadership experience from the Milad FTI anniversary event.</li><li>Coordinated 3 divisions (technical, publication, logistics) to deliver an event meeting academic and competitive standards.</li></ul> | oct 2023 – oct 2023 |

## Project

|                                                                                                                  |
|------------------------------------------------------------------------------------------------------------------|
| <b>Tourism Destination Website</b><br>Tech Stack HTML, Tailwind CSS, Alpine.js, AOS   Competition Project   2024 |
|------------------------------------------------------------------------------------------------------------------|

- *Designed and developed a responsive tourism website showcasing cultural and natural attractions in Yogyakarta.*
- *Built modern and visually engaging user interfaces using Tailwind CSS and Alpine.js.*
- *Implemented scroll-based animations and interactive elements to enhance user engagement.*
- *Optimized layouts and responsiveness across desktop, tablet, and mobile devices. Designed responsive user interfaces optimized for desktop and mobile devices.*

**Student Organization Database System**

Tech Stack : HTML, Tailwind CSS, JavaScript | Organizational Project | 2024

- *Developed a web-based information platform for displaying student organization data and activities.*
- *Built dynamic content rendering using JavaScript and JSON-based data structures.*
- *Designed responsive layouts and navigation systems to improve information accessibility.*
- *Focused on usability and maintainable frontend architecture.*

**Car Rental Website**

Tech Stack : React, TypeScript, Laravel | Freelance Project | 2025

- *Developed responsive React interfaces for vehicle browsing, booking, and rental management workflows.*
- *Built reusable UI components and interactive user experiences using TypeScript.*
- *Integrated frontend applications with backend APIs to support real-time rental data management.*
- *Optimized user flows across desktop and mobile platforms.*

**Tri Jaya Agung Business Website**

Tech Stack : React, TypeScript, Laravel | Freelance Project | 2025

- *Designed and developed a modern business profile website with a responsive product catalog interface.*
- *Built user-friendly product browsing experiences and content presentation pages.*
- *Integrated dynamic content management features through API-driven frontend architecture.*
- *Improved usability and accessibility across multiple screen sizes.*

**Training And Seminars**

|                            |      |
|----------------------------|------|
| • Leadership Education     | 2023 |
| • Design Thinking Webinar  | 2023 |
| • Google Developer Seminar | 2024 |

**Awards, Skills, and Certifications**

|                                                                                                                                                |
