Fresh Informatics Engineering graduate (Universitas Ahmad Dahlan) with full-stack development experience across three internships, building production systems with React, TypeScript, Vue.js, Laravel, and FilamentPHP. Delivered end-to-end solutions from database architecture to deployment for school information systems, business workflow platforms, and workforce-matching systems. Seeking a Full-Stack Developer role in Jakarta.

Work Experiences

SD Muhammadiyah Bausasran - Yogyakarta, Indonesia

April 2025 – July 2025

Fullstack Developer Intern

Tech Stack: Laravel, FilamentPHP, MySQL

- Built a full-stack School Information System company profile site, CMS, and online admission (PPDB) platform covering database design through deployment, used by 100+ applicants during the admission period
- Designed a centralized admin dashboard with 7 content modules, cutting manual content-update time for non-technical staff from 3 days to same-day
- Digitized student admission workflow, replacing manual paper-based process and reducing admin processing time by ~50%
- Worked directly with school stakeholders (principal, admin staff) to gather requirements and independently delivered the system end-to-end within 3 months.

Horus Technology - Yogyakarta, Indonesia

Oct 2025 – Jan 2026

Fullstack Developer Intern

Tech Stack: Vue, Python, REST API, Server-Sent Events (SSE).

- Built frontend features and integrated 12+ Python REST API endpoints for TING, a business workflow platform used by internal operations teams
- Redesigned 2 client-facing platforms (Horus corporate site + TING landing page), improving visual consistency and navigation flow
- Built a reusable Vue.js component library for the Document Management System, used across 8+ pages, reducing duplicate code and frontend dev time for new features
- Implemented real-time updates via Server-Sent Events (SSE) for an Agentic AI demo platform, enabling live interaction without polling
- Collaborated with a 4-person cross-functional team to ship features aligned with business requirements

PT Razen Teknologi Indonesia - Yogyakarta, Indonesia

February 2026 – April 2026

Fullstack Developer Intern

Tech Stack: React, Inertia, Laravel, MySQL

- Built full-stack features for a Workforce Distribution and Job Readiness Information System designed to connect 20+ schools and 30+ partner companies across school, student, company, and government stakeholders.
- Implemented role-based access control (RBAC) across 4 user groups, securing structured access for all platform users
- Built assessment and job-readiness modules used by 150+ candidates
- Built candidate management and job-matching logic based on qualifications/competencies
- Built interactive dashboards/reporting features giving school admins and government partners real-time visibility into workforce data.

Education Level

Universitas Ahmad Dahlan (UAD) - Yogyakarta, Indonesia

Sept 2022 – August 2026

Bachelor of Informatics Engineering, GPA 3.56/4.00

- Coursework emphasis on Software Engineering, Database Systems, Web Programming, and Data Structures & Algorithms.
- Thesis: Comparative Analysis Of Typescript-Based React And Vue In Medium Scale Web Application Development

SMK Negeri 1 Lamongan - Lamongan, Indonesia

July 2019 - May 2022

Multimedia Major

- Built a foundation in visual communication and digital content creation graphic design, video editing, and photography that now supports UI/UX-focused frontend work.

Organizational & Committee Experiences

Himpunan Mahasiswa Informatika (HMIF) - Yogyakarta, Indonesia

Jan 2023 - Des 2023

Staff of Strategic and Aspirational Studies Division (AKASTRAT)

- Facilitated communication between students and faculty by collecting, analyzing, and conveying academic and organizational feedback.
- Supported the resolution of student concerns through structured communication channels and stakeholder coordination.

BEM Faculty of Industrial Technology (BEM FTI) -Yogyakarta, Indonesia

Jan 2024 – Des 2024

Head of the Cadre Development Department

- Led departmental planning and execution by developing annual program roadmaps and leadership development initiatives.
- Managed department members and delegated responsibilities to ensure successful program delivery and organizational alignment.

FTI Anniversary (Milad FTI) 2024 – UAD -Yogyakarta, Indonesia

Des 2024 – Des 2024

Chief Executive (Chairperson)

- Led the organizing committee in designing and executing the faculty's anniversary celebration series, coordinating across multiple divisions and the full event timeline.
- Drove faculty identity and unity through a mix of internal and external events.

Informatics Competition 2023(UAD) -Yogyakarta, Indonesia

Oct 2023 – Oct 2023

Chief Executive (Chairperson)

- Led cross-functional committees in planning and delivering faculty-scale events involving multiple divisions and stakeholders.

- Coordinated event execution from planning through evaluation, ensuring objectives, timelines, and quality standards were achieved.

Project

Car Rental Website

Tech Stack: React TypeScript, Laravel, FilamentPHP, phpMyAdmin | Freelance Project

- Built a full-stack vehicle rental platform with reservation, customer management, and rental-tracking workflows.
- Designed inventory and scheduling modules to streamline rental operations.
- Built RESTful APIs connecting React frontend to Laravel backend, handling real-time availability checks across 50+ vehicle listings.
- Built responsive UI optimized for both desktop and mobile usage.

Tri Jaya Agung Business Website

Tech Stack: React TypeScript, Laravel, FilamentPHP, phpMyAdmin | Project School

- Built a business profile and product catalog platform to grow the client's online presence.
- Built a dynamic CMS enabling non-technical admins to independently update product listings and company info.
- Enhanced website discoverability through SEO-friendly page structures and responsive design implementation.
- Collaborated with stakeholders to translate business requirements into deployable web solutions.

Freelance Management System (FMS)

Tech Stack: React (TSX), Vite, Tailwind CSS, Laravel API | Freelance Project

- Built an all-in-one platform for freelancers to manage projects, tasks, and finances, evolving from an initial client request into a full-featured system.
- Designed a dashboard summarizing active projects, daily tasks, weekly work hours, and productivity trends through visual charts.
- Built a project board with budget tracking, deadline management, and automatic progress indicators for each project.
- Developed a project detail view with task checklists, file upload (supporting PDF, ZIP, PNG, Figma formats), and a notes editor with sharing functionality
- Built a finance module tracking client invoices, payment status (paid/pending/overdue), and monthly income breakdown
- Implemented a calendar view to visualize task deadlines across all active projects

Awards and Certifications

- **Award (2023):** Best Team – FI-CHALLENGE Fipex 2023

Technical Skills

- **Frontend:**
React.js, Vue.js, TypeScript, JavaScript, Tailwind CSS, HTML5/CSS3,
- **Backend:**
Laravel, FilamentPHP, REST API Development, PHP
- **Database**
MySQL, PostgreSQL, MongoDB
- **Tools And Workflow:**
Git, Github, Docker, Postman, Linux, CI/CD
- **Other**
RBAC & Authentication, Server-Sent Events (SSE), Responsive Web Design
- **Familiar With**
Go, Golang, Angular, MongoDB
